Objective

Motivated Computer Science and AI student with skills in full-stack Development, Web Development, Machine learning, and Data Analysis. Seeking opportunities to apply and expand my skills in a dynamic environment.

Education

PBR Visvodaya Institute of Technology and Science, India *CGPA:9.1*
BTech (Computer Science and Engineering-AI), 2025

Sri Chaitanya Junior College, India *CGPA:9.4*
Intermediate (MPC), 2021

MPL High School 8th Ward, India *CGPA:9.8*
Secondary School Certificate, 2019

Technical Skills

Programming: C, Java, python

Databases and Tools: SQL, Jupyter Notebook, VS Code, Microsoft Excell, Power BI, MongoDB

Machine Learning : Random Forest, Data Analysis, python libraries (Scikit-learn, NumPy, Pandas)

Web Development: HTML, CSS, Frontend Development, JavaScript (Beginner)

Projects

Detecting Side Effects Of Adverse Drug Reactions

- Built a GNN-based model with self-supervised learning to detect side effects from drug interactions, achieving high accuracy with CNN2D enhancement.

Rain Prediction

- Developed a model using Random Forest to predict rainfall based on weather parameters. Validated with real-world data.

Auction Online Platform

- Developed a full-stack online auction web application using MERN Stack, featuring user authentication, real-time bidding, and secure payment gateway.

Achievements

- Earned certification in Java Full Stack Development from Wipro TalentNext.
- Data Analyst intern at UptoSkills with experience in data visualization and preprocessing.
- Presented technical papers on AI and development at PBR VITS and NBKR Institute.
- Participated in quizzes and academic events, demonstrating initiative and subject proficiency.

Key Attribute

- Analytical thinker with strong problem-solving skills
- Enthusiasm for multitasking and managing multiple tasks simultaneously.
- Public speaking and presentation
